

## 1. Identification of Substance & Company

### Product

|                      |   |
|----------------------|---|
| Product name         | Natural Toilet Bowl Cleaner                               |
| Product codes        | NTC   |
| HSNO approval        | HSR002530   |
| Approval description | Cleaning Products (Subsidiary Hazard) Group Standard 2020 |
| UN number            | NA  |
| DG class             | NA  |
| Proper Shipping Name | NA  |
| Packaging group      | NA  |
| Hazchem code         | NA  |
| Uses                 | Toilet bowl cleaner                                       |

### Company Details

|           |   |
|-----------|---|
| Company   | GreenEarth Solutions Ltd                                |
| Address   | PO Box 64-125<br>Botany<br>Auckland 2163<br>New Zealand |
| Telephone | 0064 9 272 4141   |
| Email     | mail@greeneearth.co.nz                                  |
| Website   | www.greeneearth.co.nz                                   |

**Emergency Telephone Number: 09 272 4141**

## 2. Hazard Identification

### Approval

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO, Approval HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2020). The substance has been classified as hazardous according to the criteria in the Hazardous substances (Hazard Classification) Notice 2020.

| Classes               | Hazard Statements                 |
|-----------------------|-----------------------------------|
| Skin irritation cat 2 | H315 - Causes skin irritation.    |
| Eye damage cat 1      | H318 - Causes serious eye damage. |

### SYMBOLS

# DANGER

### Other Classifications

There are no other classifications that are known to apply.

### Precautionary Statements

|                   |  |
|-------------------|--|
| <b>Prevention</b> | P101 - If medical advice is needed, have product container or label at hand.<br>P102 - Keep out of reach of children.<br>P103 - Read label before use. .<br>P264 - Wash hands thoroughly after handling.<br>P280 - Wear protective gloves/eye protection.  |
| <b>Response</b>   | P302+P352 - IF ON SKIN: Wash with plenty of soap and water.<br>P332+P313 - If skin irritation occurs: Get medical advice/ attention.<br>P362 - Take off contaminated clothing and wash before re-use.<br>P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>P310 - Immediately call a POISON CENTRE or doctor/physician. |
| <b>Storage</b>    | none   |
| <b>Disposal</b>   | P501 - Dispose of contents/container in accordance with local/regional/national/international regulation.  |

# Natural Toilet Bowl Cleaner

## Safety Data Sheet

### 3. Composition / Information on Ingredients

| Component   | CAS/ Identification | Conc (%) |
|---|---------------------|----------|
| Coconut derived surfactant  | proprietary         | 4%       |
| lactic acid   | 50-21-5             | 2%       |
| citric acid   | 77-92-9             | 2%       |
| Ingredients not contributing to HSNO classes, including water, dyes, fragrances | 7732-18-5           | balance  |

This is a commercial product whose exact ratio of components may vary. Trace quantities of impurities are also likely.

### 4. First Aid

#### General Information

If medical advice is needed, have product container or label at hand. You should call the National Poisons Centre if you feel that you may have been harmed, burned or irritated by this product. The number is 0800 764 766 (0800 POISON) (24 hr emergency service).

**Recommended first aid facilities** Ready access to running water is required. Accessible eyewash is required.

#### Exposure

**Swallowed** Do NOT induce vomiting. Give a glass of water to drink. Contact a doctor. If conscious, give plenty of water to drink. DO NOT INDUCE vomiting. Contact the National Poisons Centre or a Doctor immediately. If vomiting occurs, place victim face downwards, with the head turned to the side and lower than the hips to prevent vomit entering the lungs.

**Eye contact** IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTRE or doctor/physician.

**Skin contact** IF ON SKIN: Wash with plenty of soap and water. If skin irritation occurs: Get medical advice/ attention. Take off contaminated clothing and wash before re-use.

**Inhaled** Remove victim from exposure - avoid becoming a casualty. Remove contaminated clothing and loosen remaining clothing. Allow patient to assume most comfortable position and keep warm. Keep victim at rest until fully recovered. If breathing is laboured and patient cyanotic (blue), ensure airways are clear and have a qualified person give oxygen through a face mask. If breathing has stopped, apply artificial respiration at once. In event of cardiac arrest, apply cardiopulmonary resuscitation (CPR) if trained. Seek medical attention.

#### Advice to Doctor

Treat symptomatically

### 5. Firefighting Measures

**Fire and explosion hazards:** There are no specific risks for fire/explosion for this chemical. It is non-flammable.

**Suitable extinguishing substances:** Carbon dioxide, extinguishing powder or water jet. Fight larger fires with water jet or alcohol resistant foam.

**Unsuitable extinguishing substances:** Unknown.

**Products of combustion:** Carbon dioxide, and if combustion is incomplete, carbon monoxide and smoke. Water. May form toxic mixtures in air and may accumulate in sumps, pits and other low-lying spaces, forming potentially explosive mixtures.

**Protective equipment:** Self-contained breathing apparatus. Safety boots, non-flammable overalls, gloves, hat and eye protection.

**Hazchem code:** NA

### 6. Accidental Release Measures

**Containment** If greater than 1000L is stored, secondary containment and emergency plans to manage any potential spills must be in place. In all cases design storage to prevent discharge to stormwater.

**Emergency procedures** In the event of spillage alert the fire brigade to location and give brief description of hazard. Stop the source of the leak, if safe to do so. Wear protective equipment to prevent skin, eye and respiratory exposure. Clear area of any unprotected personnel. Contain using sand, earth or vermiculite. Prevent by whatever means possible any spillage from entering drains, sewers, or water courses. (If this occurs contact your

|                        |  |
|------------------------|--|
| <b>Clean-up method</b> | regional council immediately).<br>Use absorbent (soil, sand or other inert material). Rags are not recommended for the clean-up of spills, as they may create fire or environmental hazard. Collect and seal in properly labelled containers or drums for disposal. If contamination of crops, sewers or waterways has occurred advise local emergency services. |
| <b>Disposal</b>        | Mop up and collect recoverable material into labelled containers for recycling or salvage. Recycle containers wherever possible. This material may be suitable for approved landfill. Dispose of only in accord with all regulations.  |
| <b>Precautions</b>     | Wear protective equipment to prevent skin and eye contamination and the inhalation of vapours. Work up wind or increase ventilation.   |

## 7. Storage & Handling

|                 |   |
|-----------------|---|
| <b>Storage</b>  | Avoid storage of harmful substances with food. Store out of reach of children. Containers should be kept closed in order to minimise contamination. Keep from extreme heat and open flames. Avoid contact with incompatible substances as listed in Section 10. |
| <b>Handling</b> | Keep exposure to a minimum, and minimise the quantities kept in work areas. See section 8 with regard to personal protective equipment requirements. Avoid skin and eye contact and inhalation of vapour, mist or aerosols.                                     |

## 8. Exposure Controls / Personal Protective Equipment

### Workplace Exposure Standards

A workplace exposure standard (WES) has not been established by WorkSafe NZ for this product. There is a general limit of 3mg/m<sup>3</sup> for respirable particulates and 10mg/m<sup>3</sup> for inhalable particulates when limits have not otherwise been established.

| NZ Workplace Exposure Stds | Ingredient       | WES-TWA*                     | WES-STEL         |
|----------------------------|------------------|------------------------------|------------------|
|                            | propylene glycol | 150ppm, 474mg/m <sup>3</sup> | data unavailable |

### Engineering Controls

In industrial situations, it is expected that employee exposure to hazardous substances will be controlled to a level as far below the WES as practicable by applying the hierarchy of control required by the Health and Safety at Work Act (2015) and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016. Exposure can be reduced by process modification, use of local exhaust ventilation, capturing substances at the source, or other methods. If you believe air borne concentrations of mists, dusts or vapours are high, you are advised to modify processes or increase ventilation.

### Personal Protective Equipment

|                    |   |   |
|--------------------|---|---|
| <b>Eyes</b>        |  | Protect eyes with goggles, safety glasses or full face mask. Avoid wearing contact lenses.  |
| <b>Skin</b>        |  | Avoid repeated or prolonged skin contact. Wear overalls, rubber boots and impervious gloves. Rubber gloves are recommended. Replace frequently. Gloves should be checked for tears or holes before use. Remove protective clothing and wash exposed areas with soap and water prior to eating, drinking or smoking. |
| <b>Respiratory</b> |   | A respirator when airborne concentrations approach the WES (section 8). Use a respirator with an organic vapour cartridge. If using a respirator, ensure that the cartridges are correct for the potential air contamination and are in good working order.   |

### WES Additional Information

Not applicable

## 9. Physical & Chemical Properties

|   |                  |
|---|------------------|
| <b>Appearance</b>                         | red liquid       |
| <b>Odour</b>                              | fresh odour      |
| <b>pH</b>                                 | no data          |
| <b>Vapour pressure</b>                    | no data          |
| <b>Viscosity</b>                          | no data          |
| <b>Boiling point</b>                      | ~100°C           |
| <b>Volatile materials</b>                 | no data          |
| <b>Freezing / melting point</b>           | no data          |
| <b>Solubility</b>                         | soluble in water |
| <b>Specific gravity / density</b>         | ~1.0g/ml         |
| <b>Flash point</b>                        | not applicable   |
| <b>Danger of explosion</b>                | not explosive    |
| <b>Auto-ignition temperature</b>          | no data          |
| <b>Upper &amp; lower flammable limits</b> | no data          |
| <b>Corrosiveness</b>                      | non corrosive    |

## 10. Stability & Reactivity

|   |   |
|---|---|
| <b>Stability</b>                          | Stable  |
| <b>Conditions to be avoided</b>           | Containers should be kept closed in order to avoid contamination. Keep from extreme heat and open flames. |
| <b>Incompatible groups</b>                | Oxidisers, acids, bases   |
| <b>Substance Specific Incompatibility</b> | none known  |
| <b>Hazardous decomposition products</b>   | Oxides of carbon, fragmented hydrocarbons.  |
| <b>Hazardous reactions</b>                | none known  |

## 11. Toxicological Information

### Summary

IF IN EYES: may cause eye damage.  
IF ON SKIN: may cause skin irritation.

### Supporting Data

|                |  |  |
|----------------|--|--|
| <b>Acute</b>   | <b>Oral</b>  | Using LD <sub>50</sub> 's for ingredients, the calculated LD <sub>50</sub> (oral, rat) for the mixture is >2000 mg/kg. Data considered includes: lactic acid 1810mg/kg (guinea pig), Citric acid 5040mg/kg (mouse), 3000mg/kg (rat). |
|                | <b>Dermal</b>                                      | No evidence of dermal toxicity.  |
|                | <b>Inhaled</b>                                     | No evidence of inhalation toxicity.  |
|                | <b>Eye</b>   | The mixture is considered to be corrosive to the eye, because some of the ingredients present at >3% are considered eye corrosives.  |
|                | <b>Skin</b>  | The mixture is considered to be a skin irritant, because some of the ingredients present are considered skin irritants in more concentrated form.  |
| <b>Chronic</b> | <b>Sensitisation</b>                               | No ingredient present at concentrations > 0.1% is considered a sensitizer.   |
|                | <b>Mutagenicity</b>                                | No ingredient present at concentrations > 0.1% is considered a mutagen.  |
|                | <b>Carcinogenicity</b>                             | No ingredient present at concentrations > 0.1% is considered a carcinogen.   |
|                | <b>Reproductive / Developmental</b>                | No ingredient present at concentrations > 0.1% is considered a reproductive or developmental toxicant or have any effects on or via lactation.   |
|                | <b>Systemic Aggravation of existing conditions</b> | No ingredient present at concentrations > 1% is considered a target organ toxicant. None known.  |

## 12. Ecological Data

### Summary

This mixture is not considered ecotoxic, however prevent discharge to sewer, drains or waterways.

### Supporting Data

|                                    |  |
|------------------------------------|--|
| <b>Aquatic</b>                     | No evidence of ecotoxicity towards aquatic organisms.                  |
| <b>Bioaccumulation</b>             | No data  |
| <b>Degradability</b>               | No data  |
| <b>Soil</b>                        | No evidence of soil toxicity.  |
| <b>Terrestrial vertebrate</b>      | This mixture is not considered harmful towards terrestrial vertebrates |
| <b>Terrestrial invertebrate</b>    | No evidence of ecotoxicity towards terrestrial invertebrates.          |
| <b>Biocidal</b>                    | no data  |
| <b>Environmental effect levels</b> | No EELs are available for this mixture or ingredients                  |

## 13. Disposal Considerations

|                               |  |
|-------------------------------|--|
| <b>Restrictions</b>           | There are no product-specific restrictions, however, local council and resource consent conditions may apply, including requirements of trade waste consents.  |
| <b>Disposal method</b>        | Disposal of this product must comply with the Hazardous Substances (Disposal) Notice 2017 and the requirements of the Resource Management Act for which approval should be sought from the Regional Authority. The substance must be treated and therefore rendered non-hazardous before discharge to the environment.   |
| <b>Contaminated packaging</b> | Disposal of contaminated packaging must comply with the Hazardous Substances (Disposal) Notice 2017 clause 12. Ensure that the package is rendered incapable of containing any substance and is disposed in a manner that is consistent with the requirements of the substance it contained and the material of the package. If possible reuse or recycle packaging. |

## 14. Transport Information

### Land Transport Rule: Dangerous Goods 2005 - NZS 5433:2007

There are no specific restrictions for this product (not a dangerous good).

# Natural Toilet Bowl Cleaner

## Safety Data Sheet

### 15. Regulatory Information

This product is an approved substance under the Hazardous Substances and New Organisms Act (HSNO). Approval code: HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2020. All ingredients appear on the NZIoC.

#### Specific Controls

Key workplace requirements are:

|                                 |   |
|---------------------------------|---|
| SDS                             | To be available within 10 minutes in workplaces storing any quantity.   |
| Inventory                       | An inventory of all hazardous substances must be prepared and maintained.   |
| Packaging                       | All hazardous substances should be appropriately packaged including substances that have been decanted, transferred or manufactured for own use or have been supplied |
| Labelling                       | Must comply with the Hazardous Substances (Labelling) Notice 2017.  |
| Emergency plan                  | Required if > 1000L is stored.  |
| Certified handler               | Not required.   |
| Tracking                        | Not required.   |
| Bunding & secondary containment | Required if > 1000L is stored.  |
| Signage                         | Required if > 10000L is stored.   |
| Location test certificate       | Not required.   |
| Flammable zone                  | Not required.   |
| Fire extinguisher               | Not required.   |

Note: The above workplace requirements apply if only this particular substance is present. The complete set of controls for a location will depend on the classification and total quantities of other substances present in that location.

#### Other Legislation

In New Zealand, the use of this product may come under the Resource Management Act and Regulations, the Health and Safety at Work Act 2015 and the Health and Safety at Work (General Risk and Workplace Management) Regulations 2016, local Council Rules and Regional Council Plans.

### 16. Other Information

#### Abbreviations

|                        |  |
|------------------------|--|
| <b>Approval Code</b>   | Approval HSR002530, Cleaning Products (Subsidiary Hazard) Group Standard 2020 Controls, EPA. <a href="http://www.epa.govt.nz">www.epa.govt.nz</a>  |
| <b>CAS Number</b>      | Unique Chemical Abstracts Service Registry Number  |
| <b>EC<sub>50</sub></b> | Ecotoxic Concentration 50% – concentration in water which is fatal to 50% of a test population (e.g. daphnia, fish species)  |
| <b>EPA</b>             | Environmental Protection Authority (New Zealand)   |
| <b>GHS</b>             | Globally Harmonised System of Classification and Labelling of Chemicals, 7 <sup>th</sup> revised edition, 2017, published by the United Nations.   |
| <b>HAZCHEM Code</b>    | Emergency action code of numbers and letters that provide information to emergency services, especially fire fighters  |
| <b>HSNO</b>            | Hazardous Substances and New Organisms (Act and Regulations)   |
| <b>IARC</b>            | International Agency for Research on Cancer  |
| <b>LEL</b>             | Lower Explosive Limit  |
| <b>LD<sub>50</sub></b> | Lethal Dose 50% – dose which is fatal to 50% of a test population (usually rats).  |
| <b>LC<sub>50</sub></b> | Lethal Concentration 50% – concentration in air which is fatal to 50% of a test population (usually rats)  |
| <b>NZIoC</b>           | New Zealand Inventory of Chemicals   |
| <b>STEL</b>            | Short Term Exposure Limit - The maximum airborne concentration of a chemical or biological agent to which a worker may be exposed in any 15 minute period, provided the TWA is not exceeded  |
| <b>STOT RE</b>         | System Target Organ Toxicity – Repeated Exposure   |
| <b>STOT SE</b>         | System Target Organ Toxicity – Single Exposure   |
| <b>TWA</b>             | Time Weighted Average – generally referred to as WES averaged over typical work day (usually 8 hours)  |
| <b>UEL</b>             | Upper Explosive Limit  |
| <b>UN Number</b>       | United Nations Number  |
| <b>WES</b>             | Workplace Exposure Standard - The airborne concentration of a biological or chemical agent to which a worker may be exposed during work hours (usually 8 hours, 5 days a week). The WES relates to exposure that has been measured by personal monitoring using procedures that gather air samples in the worker's breathing zone. |
